PROFESSIONAL SUMMARY

Results-driven Flutter Developer with 3+ years of commercial experience building and shipping production-grade mobile applications across SaaS, fintech, gaming, POS, streaming, and CRM domains. At The SoftKing Ltd., I have independently delivered 11+ published CodeCanyon products and 15+ fully custom client projects — all meeting or exceeding client expectations.

I bring an architect's mindset to every project — designing scalable state management layers, integrating Firebase & REST back-ends, wiring payment gateways, and obsessing over UI performance and user experience. I thrive in cross-functional teams, adapt quickly to new technologies, and take full ownership from first commit to live release.
